Agenda Item 5

Enclosure 2

Paper RC 31 / 03

## **REGISTRATION COMMITTEE**

**Return to Practice** 

From : the Executive

FOR DISCUSSION

## Return to practice

## Executive Summary

The Committee is asked to consider the enclosed document. The Committee is asked to confirm its recommendations for the requirements to be met by applicants in the following categories wishing to return to practice:

(1) Applicants for renewal or readmission who have practised at some point in the last two years—no additional education, training and experience requirements.

(2) Applicants for renewal or readmission who have not practised for between two and four years—30 days supervised practice and private study to bring skills or knowledge up-to-date.

(3) Applicants for readmission who have not practised for more than four years—120 days supervised practice and private study to bring skills or knowledge up-to-date. There should be no circumstances in which an applicant for renewal should have been out of practice for this length of time.

(5) Applicants for admission whose qualification is at least five years old—120 days supervised practice and private study to bring skills or knowledge up-to-date.

In addition the Committee is asked to determine and make recommendations about the following:

- (1) That where private study is specified, the Committee will also consider a reasonable equivalent such as formal structured study to be acceptable in meeting the requirements.
- (2) That provision stipulated for four years and over be allowed to discharge the requirement stipulated for those out of practice for two or more years.
